WISI GN 55 W 0230

Additional power supply 230 VAC for redundancy

Description

With the optional power supply GN 55 W 0230 for 230 V AC, the reliability of the Chameleon platform will be significantly increased - carrier grade. Thanks to the use of the optimised load sharing of redundant power supply, a permanent and reliable supply of the platform is guaranteed. During the operation, even in case of an error, the PSU can be changed without impairment of the customer signal. Furthermore, the PSU or the complete Chameleon Platform can be integrated in a Performance Management Tool. For the PSU the most important parameters (internal, external output voltage, output current, temperature, type, serial number) can be transferred via SNMP.

At a glance:

- Hot pluggable
- Load sharing with redundant PSU
- Information readable: type, serial number, hardware ID, software ID, max. output power, threshold of max. current, voltage and temperature
- Measure values: output voltage internal, output voltage external, output current, temperature
