Insultherm Sleeves

Double Wall Fiberglass Sleeves Protect Wires & Spark Plug Boots to 1,200° F

For years, Techflex's Insultherm braided fiberglass sleeving has been the first choice among automotive professionals and enthusiasts alike for many of their thermal protection applications.

Now, we're introducing the same high temperature protection in an easy slip on sleeve that will extend the life of expensive spark plug wires by protecting them where they need it most... at the boot. Just slip these 3/4" diameter double thickness (triple thick at the sewn end) sleeves over any spark plug cable and boot (even right angle boots) to protect them from engine temperatures in excess of 1,200°F. Once installed, the sleeves require no clearance from hot surfaces, and can even rest directly on hot exhaust headers without any effect.

Insultherm Spark Plug Boot Sleeves (FG) are completely non-conductive, resist all engine chemicals, will not support combustion, and provide an easy, economical solution to the challenge of wire protection in the cramped, high temperature environment of any high performance engine compartment.

- Economical, Long Lasting Protection
- Easy, Slip On Installation
- Protects Up To 1,200°F
- Halogen and Asbestos Free
- Resists Gasoline and Engine Chemicals

Insultherm Spark Plug Boot Sleeves are available in retail packaging as part of Techflex's exclusive "Double Yellow" performance products line.

Insultherm Spark Plug Boot Sleeves can rest directly on hot headers and other engine components without burning, melting or becoming brittle.

Length	Part #	Diameter	Wall Thickness	Bulk Minimum	Available Colors
6"	FBN0.75	3/4"	.085	Special Order	7 1/2" Natural is an in-stock item. All other combinations are special order. Please contact your Account Rep for details.
