

Soft, Pliable Flame Protection To 700° F.

Woven Nomex® clothing and protective gear has been used for years by race car drivers, municipal fire departments and oil rig personnel to provide that extra level of comfort and protection from the dangers that come with working in and around intense flame and heat. Our NX Nomex® sleeving will do the same for your wires, hoses and cables.

NX will protect your application in temperatures up to 700° F. It is unaffected by short term exposure to most acids, bases, solvents and common engineering chemicals. Despite the soft touch and smooth appearance associated with woven aramid fibers, NX is incredibly strong, with a tensile strength of 90,000 psi.

The densely braided sleeving provides full coverage and protection on even the most exposed applications.

NX sleeving cuts easily with regular scissors and the smooth surface eases installation even over long wire runs. The construction allows slight expansion to accommodate irregular surfaces and tight turns.

- **Soft, Pliable & Strong**
- **Cut & Abrasion Resistant**
- **Protects to 700°F**
- **Halogen and Asbestos Free**
- **Resists Gasoline and Engine Chemicals**

Additional sizes are available by special order.
