

**Three Generations**

**of Customer Service**

**and Product Expertise**

**HERITAGE**

Since 1963, the Dermody family, founders and operators of Techflex, has been engineering and manufacturing a wide range of braided sleeving products for a variety of industries from biomedical and aerospace to wire, hose and cable bundling protection solutions for hot rod enthusiasts. Our experience with this broad market, as well as our wide selection of general purpose and high-tech specialty products, has made Techflex the first name in braided sleeving solutions.

**SERVICE**

We are organized and staffed to provide our customers with the finest products and account support possible. Our account personnel are continuously trained in both technical aspects and application possibilities of our entire line of products.

Through the use of our ISO 9001 certified management system, total product quality is maintained throughout the entire organization, from initial product design through final shipment and account follow through.

**Performance  
Racing** Industry

For detailed information on all of our products, ask for a copy of our Product Education DVD

**INNOVATION**

It begins with the most varied and complete range of braided sleeving products in the industry and continues with a corporate culture of customer fulfillment and satisfaction. If your application calls for braided sleeving, and the job needs to be done right, Techflex can do it.

Aggressive new product development programs, combined with a management team dedicated to directly targeting the needs of a constantly evolving market, result in a wide range of exciting products that will fully meet your needs for economical and durable sleeving solutions.

**CUSTOMIZATION**

We are completely in-house equipped to fabricate our products into virtually any size or shape, for any application. Services include high speed digital cutting and counting, customized kitting and private labeling programs. We will fabricate custom material and color combinations to tight specifications. We have facilities for multistep processing such as flattening, rounding, ultrasonic cutting and welding. Our custom services can help you realize your design and application goals.

**PRODUCT CONTROL**

Our Techflex Spec initiative sets the industry standard for the continuous tracking of products, from their earliest manufacturing steps through final delivery to customers at any volume. Managed receiving, inventory and automatic lot and spool tracing, originator documentation, and constant quality testing and documentation ensure that included products will perform as indicated and will meet the specific needs of all of our customers. This system, along with our program of product reliability assurance means that our customers can remain confident that any Techflex Spec product will not only meet industry standards, but may vastly exceed them in many instances.

Cert. # US04/3598

Techflex Spec: Products which meet standards for lot traceability and manufacturing documentation.

Color Available: Black

Approved: ABYC, FAR-25, FMVSS-302, UL 94 V-0, RoHS Compliant, CSA, UL, Halogen Free and Techflex Spec.

*F6's unique split, semi-rigid braided construction makes it the ideal solution for situations where ease of installation is of primary importance. The lateral split allows the tube to open up to accommodate a wide variety of bundling requirements, and simply closes around the entire installation without the need for any additional fasteners (velcro, tape, etc.)*

*The 10 mil PET braid is lightweight, quiet and flexible. The 25% edge overlap (at nominal diameter) allows coverage around inline plugs, connectors and splices.*

**F6 TOOL**

The F6 Installation Tool makes installing long length applications quick and easy.

- 1/4" INN0.25OR
- 1/2" INN0.50OR
- 3/4" INN0.75OR
- 1" INN1.00OR
- 1 1/2" INN1.50OR

F6 Tool

Cut and Abrasion Resistant

Cuts Cleanly with Hot Knife/can be cut with Scissors

More Flexible than Split Convuluted or Spiral Wrap

Soft and Quiet in High Vibration Uses

The large overlap allows easy installation over splices and inline connectors without exposing wires and cables.

*By adjusting the physical characteristics of the polyethylene terephthalate filaments, the engineers at Techflex have produced a product with the same specifications of our PT with the unique advantage of being able to cut the material with ordinary scissors and still maintain an extraordinarily fray-resistant end.*

*Flexo Clean Cut is ideal for field installers and other situations where access to a hot knife is impossible. Cuts easily and neatly with regular scissors and maintains a fray-resistant end during installation. When scissor cut, the end of Clean Cut will withstand heavier handling without fraying than standard PT.*

**SERRATED EDGE SCISSORS**

Serrated Edge Scissors

Serrated, angled shears are ideal for cutting Clean Cut, Flexo Stainless and other sleeving types. Comfortable, high impact grips and stainless steel blades ensure years of use.

The Flexo® Original PET is braided from 10 mil polyethylene terephthalate monofilament yarns. The material has a wide operating temperature range, is resistant to chemical degradation, UV radiation and abrasion. Used in electronics, automotive, marine and industrial wire harnessing applications where cost efficiency and durability are critical.

The unique braided construction and wide expandability allows quick and easy installation over large connectors and long runs.

••• TAKE A LOOK in the styling section, page 7, Flexo® Original PET comes in the widest range of standard available solid and spiral colors in the industry.

**TRAILER HITCH HARNESS KIT**

**ULN0.00BK**

Versatile and Economical Termination Solution

Wide Selection of Sizes and Colors

Resists Common Automotive Chemicals

Easily Installs over Connectors and Splices

Custom Lengths Available

Shrinkflex heatshrink tubing is the ideal way to create a tight, professional finish on any wire, hose or cable management project. Once shrunk, the tubing will hold its reduced state even in elevated temperatures. The wide range of available colors and diameters make Shrinkflex a perfect solution for any termination application.

Shrinkflex heatshrink tubing is a versatile and economical termination solution that resists common automotive chemicals and installs easily over connectors and splices. Shrink temperature 194°F.

••• Shrinkflex can be printed with your logo or part number for branding or identification.

**Adhesive Wall Shrinkflex**

Dual wall adhesive lined heatshrink tubing is ideal for producing strong, weathertight seals on any heatshrink installation. During the application of heat from a heat gun or other heat source, the inner adhesive wall melts and flows, creating an adhesion layer to ensure a snug fit to your harness or connector. Adhesive lined heatshrink has a 3:1 shrink ratio, and is available in 4' strips or 6" cuts, in diameters up to 1".

Approved: ABYC, UL 94 V-0, RoHS Compliant, CSA, UL, Halogen Free, Mil Spec/5, VW-1 and Techflex Spec.

The look of stainless steel braid with an upside! No installation hassles, surface abrasion and ridiculous expense. Just the look of polished braided steel. These heavy duty metallized mylar sleeves are ideal for dressing up any application.

Chrome has a more open look, transparent PET is braided together with metallic strands to create a slight glimmer when light strikes it and allows the color of the application to come through for a special effect. Resists gasoline, engine chemicals, and abrasion.

*Flexo F6 Quiet is specially engineered to reduce the noise associated with wire harnesses or cables installed in hard to reach areas such as door panels or dashboards. The special construction suppresses noise from loose harnesses moving against body or dash panels. F6 Quiet also has a soft and flexible feel, reminiscent of old style cotton loom, making it the perfect product for restoration projects.*

### HANDHELD HOT KNIFE

Perfect for individual projects or small volume production. The large knife blade heats quickly and easily cuts and seals most grades of braided sleeving. Handle can also be used as a soldering gun with the appropriate tips.

Handheld Hot Knife  
HKH0.00BK

Replacement Knife Blade  
RBH0.00SV

F6 comes in custom designed display/dispenser boxes. The boxes have die-cut handles for easy transportation and an eye-catching graphic design.

Nostalgic Look and Feel!  
Modern Day Performance!

The newest item in the ThermaShield line of aluminized fiberglass products, T6 is designed for ease of installation when component disassembly isn't practical. Just wrap the pre-formed, split flexible tube around any component and seal the sides with the high temperature adhesive strip to provide protection from hot pipes and engine components.

The highly reflective aluminized exterior, combined with the insulating fiberglass interior, protects delicate wire bundles, cables and lines from damage caused by nearby exhaust pipes, headers or other heat generating components.

**T6 can reduce the heat transmission from hot pipes or engine components into hoses or harnesses by up to 50% or more.**

T6 is shipped in pre-cut 4' lengths

FireFlex silicone jacketed fiberglass sleeving is the choice of professionals in racing and other industries where protection from constant temperatures approaching 500°F is mandatory. Engineered to contain radiant exhaust and coolant heat within pipes and hoses and to protect expensive performance equipment and operators from thermal damage.

FireFlex is completely non-conductive, will not melt, delaminate, become brittle or support combustion under normal conditions, and provides a professional level solution to thermal protection needs in any application.

**FIREFLEX FIBERGLASS SILICONE SLEEVING KIT**

Minimum order one case. 4-Kits Per Case. Single color per case.

**THERMASHIELD FLAT** is an aluminum laminated fiberglass sheet with a full coating of permanent, high temperature adhesive. This unique product applies directly to any clean surface. Ideal solution for protecting delicate electronic component boxes mounted close to engines or other heat sources. When applied, the aluminum laminate reflects heat away and the insulating fiberglass backing protects the fragile contents from thermal damage and failure.

**ALUMINUM HEAT REFLECTING TAPE**

A 3 mil high strength self wound dead soft aluminum foil coated with an aggressive acrylic adhesive system to create a superior bond.

- 1 1/2" UAT1.50SV
- 2" UAT2.00SV

Great for terminating intersection points and breakouts.

- Economical and Easy to Install
- Cuts Cleanly with Scissors
- Reflects Radiant Heat
- Insulates Delicate Wires and Components
- Resists Gasoline and Engine Chemicals
- Cut and Abrasion Resistant

Color Available: Natural and Black.

Approved: RoHS Compliant, Halogen Free and Techflex Spec.

Extremely high temperature resistant. Commonly used for headers and exhaust.

**HEADER WRAP INSULTHERM™** reduces under-hood temperatures up to 70% and increases horsepower and fuel efficiency. Manufactured from texturized fiberglass yarns and woven into a strong and flexible wrap with vermiculite coating. Withstands heat up to 1,000°F.

**HEADER WRAP SI** is made from texturized amorphous silica filament yarn woven into a strong and flexible form. Because the yarn is texturized into a bulky form it provides excellent insulating values. Header Wrap SI is not made from leached fiberglass, resulting in a much more wear resistant finished product. Withstands heat up to 2,000°F.

**HEADER WRAP**

**INSULTHERM (FG)** is an extremely high temperature resistant sleeve commonly used as thermal protection for wires, cables and hoses that are subjected to continuous and extreme high temperature environments, such as engine manifolds and exhaust systems.

**FG** is braided from fiberglass yarns and coated with high temperature resins. FG is tough and durable, maintaining its tight structure under extreme vibration, abrasion, mechanical stress and temperature variations. Installs easily over a variety of applications to either deflect or retain heat in environments up to 1,200°F.

**INSULTHERM KIT**

- Wire/Cable Harnesses
- Hoses/Fuel Lines
- Chains and Springs

Resists Snagging

Prevents Damage from UV, Gasoline, Engine Chemicals and Salt

Resists Cut, Abrasion and Penetration

Flexible and Economical General Purpose Protection

Deflects High Pressure Hose Ruptures

No Damage After 100,000 Abrasion Cycles

Color Available: Black  
Approved: RoHS Compliant and Techflex Spec.

The tightly woven Nylon® makes Dura Flex the perfect solution for hose and cable protection. The .09 inch wall thickness will protect cables, hoses and ropes from weather, sunlight and abrasion damage.

When installed over uncoated cable or chains, DF will prevent scraping, chafing and contact damage to painted or other fragile surfaces.

DF is resistant to chemicals, UV damage and rot, and is suitable for continuous outdoor use under all weather conditions. The flexible sleeving cuts with scissors and the tight construction slides easily over any application.

**WRAP 'n SEAL TAPE**

High strength tape works on dirty or wet surfaces. Ideal for automotive and marine hoses. Self-sealing and waterproof.

DURA WRAP (DW) is the answer to organizing and controlling wires, cables and hoses that are subjected to constant and extreme use. The flexible sleeve is made from tightly woven ballistic Nylon® with an aggressive, industrial strength hook and loop closure. DURA WRAP is used on wires to keep them together, on hoses and cables to prevent abrasion damage or on chains to keep them from ruining expensive finished surfaces.

DW provides greater abrasion resistance and water repellency than other Nylon® sleeves and is being tested for certification under the U.S. Dept. of Labor's MSHA.

DW is extremely flexible and easy to install over single or multiple hoses. In the event of a hose rupture, the high strength sleeving helps prevent high pressure fluid from becoming a danger to equipment operators and other personnel.

**Stainless Steel Cable Ties**

High temperature stainless steel cable ties tighten easily without special tools. Perfect for installing heavy duty and high temp sleeving.

Specially engineered from 1050 ballistic nylon with a urethane coating, WeldWrap is ideal for protecting hoses and wiring from damage caused by molten welding splatter and sparks. The heavy duty hook and loop closure ensures a tight seal and allows WeldWrap to be installed easily over existing assemblies. WeldWrap also provides a high level of abrasion and penetration protection to increase the useful life of any hoses exposed to rough or abrasive surfaces.

**ECONOMY KEVLAR® SHEARS**

Specially designed stainless steel shears with deeply serrated edge easily cuts through tough aramid sleeving without dulling the blade or damaging the sleeving. Large, comfortable handle accommodates left or right hand use. 6" long. Handle color may vary.

SHR0228-AS

Color Available: Black  
Approved: RoHS Compliant and Techflex Spec.

Gorilla Sleeve utilizes flat filaments to achieve a thick abrasion guard for use on hoses. This type of sleeve has been tested against competitor's abrasion guards that mix materials in an effort to gain slight abrasion advantages.

Gorilla Sleeve achieves better results without sacrificing great looks or flexibility.

**HEAVY DUTY HANDHELD HOT KNIFE**

German engineered, heavy duty hand held hot knife. Long life trigger switch. Heats quickly to 1,100°F. Interchangeable blades. 110 or 220 volt models available.

Once installed, the sleeves require no clearance from hot surfaces, and can even rest directly on hot exhaust headers without any effect.

**Spark Plug and Ignition Wire Protection**

**Double Wall Construction**

For years, Techflex's Insultherm braided fiberglass sleeving has been the first choice among automotive professionals and enthusiasts alike for many of their thermal protection applications.

With the same high temperature protection in an easy slip on sleeve that will extend the life of expensive spark plug wires by protecting them where they need it most... at the boot. Just slip these 3/4" diameter double thickness (triple thick at the sewn end) sleeves over any spark plug cable and boot (even right angle boots) to protect them from engine temperatures in excess of 1,200°F.

Insultherm Spark Plug Boot Sleeves are completely non-conductive, resist all engine chemicals, will not support combustion, and provide an easy, economical solution to the challenge of wire protection in the cramped, high temperature environment of any high performance engine compartment.

**IGNITION SYSTEM**

**IGNITION SYSTEM**

- Continuous Filament E-type Glass
- Protects to 1,200° F.
- Stays Flexible in Low Temps.

Insultherm Ultraflex fiberglass sleeving is ideal for the protection of wires and hoses exposed to the heat generated from high performance engine and exhaust components. The heat treated sleeving cuts with scissors and is compatible with most bonding and saturation systems. Ultraflex expands slightly, allowing it to slide easily over wires and follow curves and contours without binding.

The heavy wall (1/32") construction, large available diameters and high expandability of Ultraflex Pro provides a high level of protection and ease of installation when used to insulate pipes and hoses subject to abrasion and vibration. Ultraflex Pro cuts easily with scissors, and the special heat treated construction minimizes fraying and dusting during assembly.

**Metal Braid Heavy Duty**

Spools fit into Display (see page 30)

Color Available: Silver.

Approved: RoHS Compliant and Techflex Spec.

Tinned Copper Sleeve for shielding, grounding and decoration. Our skill with braided sleeving extends to many materials including metal braid for a variety of applications. Our tinned copper braid is perfect for shielding on harnesses and cables. Wire conforms to ASTM-B 33.

High end automotive applications have always used braided metal for secure and efficient grounding applications. The material is also great for hose covering on hot rods and motorcycles.

- EMI, RFI, ESD Protection
- Grounding Straps
- Engine Dress-Up
- Military Applications
- Extreme Blowout Protection
- Expands for Easy Installation
- Cut and Abrasion Resistant

Spool and product management is now simpler and more efficient than ever. Our new display/dispenser rack allows easy control of sleeving inventories and provides a controlled system for neatly dispensing directly from the spools. The rack is constructed from tough ABS plastic, with plenty of room for a wide range of products. The spools simply drop into the preformed slots and turn freely for dispensing. Full visibility and access ensures easy management of remaining inventory and simple drop-in replacement of empty spools.

Products showing this symbol will fit into the display

Space saving, easy access design

Engineered for easy and secure wall mounting
