

- **Water Repellent When Properly Sealed**
- **Will Not Support Growth of Bacteria**
- **Disinfects Easily**
- **Adhesive Resists Most Cleaners and Disinfectants**

Stylish Fluid Protection For Wires & Cables

Our new L6 LIQUID WRAP (L6N) semi-rigid wraparound sleeving is engineered from tough braided polyester, and laminated with a layer of strong Mylar® sheeting. This combination provides a strong and lightweight solution for any application that requires protection from repeated exposure to the elements.

The wraparound construction makes installation easy over existing assemblies or harnesses, and the extra wide adhesive strip ensures a positive, aggressive seal against damage from exposure.

L6N is available in 8' pre-cut sticks in Black.

The fluid resistance of Liquid Wrap sleeve makes it ideal for cable management in medical applications.

L6N is ideal for marine and automotive wiring harnesses.

Nominal Size	Wall Thickness	Part #	8' Pcs. Put-Ups				Available Colors	Lbs/10Pcs.
			Bulk Box	Box 8x8	Box 6x6	Box 4x4
