

# WISI DRA 1313

FLEXSWITCH line amplifier, for three satellites

## Description

The DRA 1313 is an amplifier for 12 polarizations of three satellite and terrestrial signals. With a gain of 26 dB the DRA 1313 is optimally suited for use as line amplifier in multi-switch cascades. The gain can be individually reduced by 10 dB at each input, in order to compensate differences in level between the individual polarizations. The supply voltage can be realized either locally, through the optional power supply DRP 1533 or via remote power at the trunk lines.

## At a glance:
